WOODEN PALLETS AND BOXES

Welcome to Shree Shankar Vijay Saw Mill
One of the company producing pallets as per ISPM # 15 HT in commercial way.

Established in the year 1985 we, "Shree Shankar Vijay Saw Mill", are widely appreciated for manufacturing, supplying and trading the best range of Wooden Pallets, Boxes and Crates. Under this range, we offer Two way pallets, Four way pallets, Hardwood Wooden Pallets and Ply Wooden Pallets. Along with this, we offer our clients with Rubber Wood Boxes, Timber Wood Pallets, Industrial Wooden Boxes, Pine Wooden Boxes, Industrial Wooden Boxes, Pine Wooden Crates, Pine Wood Swan Sizes, Film Faced Plywood, Pine Wood Collar, CP Pallets, EURO Type Pallets and many more. This range is manufactured by making use of high-grade wood and others. Basic material which we use, is procured from the established vendors of the industry. Furthermore, this range is meticulously design as per the market demands and clients' detailed specifications. Our products are widely appreciated for their significant attributes such as durability, high load bearing capacity and light weight. We offer this range in different sizes and designs to meet diversified demands of the clients. Our range is perfect for packaging purposes of delicate items. With the assistance of our production team, we have been able to bring forth an impeccable range of products. Professionals having immense knowledge and experience are working with us. Our professionals meticulously carry out entire production process right from the procurement basic material till the quality testing. We also have a team of managers and administrators which assists us in executing business operations in an ethical manner, enabling us to meet expectations of the clients. Besides, we have a sophisticated infrastructure setup located at Vadodara (Gujarat, India). We have thoughtfully segregated our setup in different units such as production, quality and warehouse to ensure hassle free flow manufacturing process. The production unit is installed with all the required advanced machinery of latest version and amenities. Furthermore, our warehouse facility allows us to store products in bulk quantity, making us to meet urgent demands of the clients. With a view to meet deadlines of delivery, we have made our setup connected with all the major transportation modes. Furthermore, ever since our inception, we have been serving our customers with ethical and client-centric approaches. It is due to aforementioned factors, we have been able to garner trust of significant clients based across the

Our Infrastructure

A state-of-the-art infrastructure facility is developed by us, which enables us in carrying out all our business activities in a streamlined manner. The infrastructure of our firm is installed with advanced technologies and latest machines that are required for bulk production. Due to sprawled infrastructure, we have been able to meet the diverse requirements of our customers in an efficient manner. A team of experienced professionals is recruited by us for proper management of all the activities of our infrastructure. Further, for trouble-free working and timely completion of all the trade tasks efficiently, we have segmented our infrastructure into the following mentioned

Units:

IN-HOUSE DESIGNING UNIT | MANUFACTURING UNIT | QUALITY INSPECTION UNIT
WAREHOUSING AND PACKAGING UNIT

Our Team

We are associated with experienced team of professionals, which possess sound industry knowledge of their domain. The professionals working with us are aware of the latest market trends and packaging industry. These experts work in close synchronization among themselves as well as with the customers to know their exact needs and after that provide them products and services accordingly. Further, skills enhancement classes and seminars are organized by us at regular intervals to keep our workforce abreast with latest technologies and market dynamics.

Our team consists of the following professionals:

Designers | Quality Analyzers | Skilled & Semi-skilled Professionals
Warehousing & Packaging Experts | Sales & Marketing Executives

Quality Assurance

Quality has been the prime priority for our organization and for maintaining this, we manufacture the offered range using optimum grade wood and other raw material by employing latest technologies. All the offered products and rendered services are in accordance with the international standards. Moreover, a team of quality analyzers is appointed by us, which properly scrutinizes the offered range and ensure its flawlessness, before the final dispatch. Further, our experts check all the developed products at our quality inspecting unit on varied parameters.

Following are the grounds on the basis of which we decide flawlessness of our entire gamut:

**Moisture Content Of The Wood | Dimensional Accuracy
Finish | Joint & Fixes Of The Final Product Durability | Weight**

**Owing to the qualitative products and services offered by us, we have been able to gain
ISO 9001:2008 Certification**

Warehousing & Packaging

We have developed a capacious warehousing facility at our base for safe storage of all the manufactured products and procured raw material. This unit is outfitted with all the necessary material handling tools and equipment that help in easy retrieval. Moreover, our warehousing unit is segregated into varied sub-sections for storing the products as per their respective categories. Our warehouse is efficiently managed by an experienced team of warehousing personnel, which keeps a close tab on all the incoming and outgoing of consignments. Due to the excellent connectivity of our warehouse with varied transportation networks, we have been able to deliver all the products at the clients' end within the promised time.

Client Satisfaction

We are a customers-centric firm, which aims at maximizing the contentment of our respectable patrons. The products offered by us are nicely designed and developed by the professionals as per the contemporary market trends. Clients can avail these products in a variety of sizes, designs and patterns as per their needs. Moreover, our experts keep in close touch with the customers to provide them custom-designed version of our products. For on time delivery of our products at the customers' preferred destination, we are connected with varied transportation modes. Owing to the customer-oriented approaches, timely delivery of orders and transparency in business dealings, we have been able to garner a huge clientele across Indian Subcontinent. Further, to meet the needs of international clients, we export 40-60% of our stock.

Why Us.....?

We have positioned ourselves as a renowned organization due to qualitative products offered by us. Our transparency in business dealings, ethical trade practices and wide distribution network have enabled us to gain an edge over our industrial counterparts. Besides these, there are varied other important factors that have helped us in becoming the preferred choice of our patrons.

These factors are mentioned below

**Technologically advanced infrastructure
Experienced & talented pool of professionals | Strict quality control programs
Reliable services | Easy payment options | Wide distribution networks**

"Best Supplier 2011 " Continuous Support Round
The Clock To ensure On Time delivery.

ISPM # 15 HT

International Plant Protection Convention (IPPC) which is a multilateral treaty aiming to prevent the spread and introduction of pests of plants and plant products – and to promote appropriate measures for their control.

ISPM 15 originated from the International Plant Protection Convention (IPPC) which is a multilateral treaty aiming to prevent the spread and introduction of pests of plants and plant products – and to promote appropriate measures for their control. The ISPM 15 standard requires softwood and hardwood packaging to be heat treated or fumigated to kill insects or fungus prior to export.

All shipments using any species of solid sawn wood packaging must be heat treated (or fumigated if allowed) by the final assembler and stamped with the approved stamp before being allowed entry to or crossing through

a participating country. Shipments going to any of the listed countries after their implementation dates can be stopped at the border if they do not have the proper stamps on the unit.

The stamps show customs that all solid wood packaging material has been treated to meet the new global ISPM 15 requirements. Non compliance can be a serious problem. Many customs have said they can turn back, repackage or destroy items that do not meet the standards. Delays and costs will be the responsibility of the shipper of record. For example, the United States standard requires immediate re-export of non-compliant products with no exceptions. The regulations break down into two key areas – export and treatment documents. Exactly how many documents are required varies from country to country and you can find out the precise requirements by clicking on your chosen country from the country guide. The export document is known as the Phytosanitary Certificate and is governed under the International Plant Protection Convention.

Product Range

Four-way Entry Pallets

Features :

- 1) 1200mm x 1000mm - either available with a frame or skid base. They also come either flush sided (as in photograph) or 'winger' style.
- 2) We offer these pallets in Three different grades. All pallets can be painted to your specification.
- 3) The Grade One heavy duty pallet. A clean once used pallet suitable for loads of up to 1.5 tonnes.
- 4) Grade Two comprises the same dimensions, however the timber will not be as thick and gaps between the timber will be wider. Suitable for weights up to 1 tonne.
- 5) Grade Three is a lighter weight 4 way.

It can develop as per client requirement.

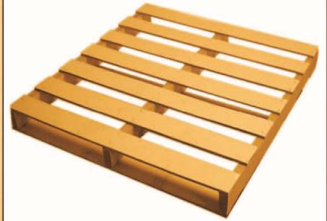

Two-way Entry Pallets

Features :

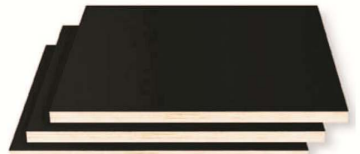

- 1) Two way entry pallets are available in a range of sizes from 900mm up to 1500mm.
- 2) They can be either three or four bearer.
- 3) Pallets can be specified as fully reversible or skid type.

It can develop as per client requirement.

Film Faced Plywood

We are one of the prominent wholesaler of **Film Faced Shuttering Plywood**. These are extensively demanded by clients owing to optimum quality, durability and excellent finish. The Designer Laminated Plywood is highly appreciated in the market owing to its features like durability and strength. It is also capable to hold the load concrete and quivers generated during pouring the concrete.

The Timber

Pine Wood Timber

Pine wood was originally regarded as suitable only for fruit boxes and boxing for concrete, but soon came into use as house-framing timber. This was made possible by timber grading, drying and preservation technologies.

Its knottiness was in contrast to the clear wood of native softwoods, so it was not at first thought fit for furniture, panelling, fittings, flooring, and house cladding. Now it is used for all those purposes.

Pallets Collars

The wooden collar system is a well-established packaging solution, used worldwide. The collars can be customised if necessary and provided with 4 or 6 galvanised steel hinges.

The flexible collar system has all the advantages of a modern returnable system. It is a standardised way of transporting goods and damaged collars or lids can be replaced easily. The investment costs are relatively low and under normal conditions the packaging will last for more than 10 years. Furthermore it is a collapsible, strong and reliable design.

Plywood Box

We are one of the noted manufacturers and suppliers of an extensive range of Plywood Boxes. Plywood is a special type of wooden sheet known as veneers. The plywood sheets are available in single as well as multiple layers as per the specific demands of the industry. We make our plywood boxes in different sizes and color patterns to fulfil the growing requirements of manufacturing and retail sectors.

Euro Standard Wooden Pallets

We have in-store for our clients a wide range of Euro Standard Wooden Pallets, which is crafted from premium quality wood and have a long shelf life. These pallets are widely acclaimed in the industry for their sturdiness and durability. Our range of Euro Standard Pallets is available in various sizes and dimensions to suit the varied requirements of clients.

CP Pallets

Created at the beginning of the Nineties by the VCI (Verband der Chemischer Industry), the CP type pallets are dedicated to the chemical industry. Since, their management was entrusted to the APME (Association of Plastics Manufacturers in Europe) which organizes their diffusion and the collection on a European scale.

The standard defines nine models of pallets, of CP1 with CP9, being able to carry out several rotations. If needed, the CP pallets can undergo one or more repairs. At the end of lifetime and like any support of handling, they are developed or eliminated.

The CP pallets answer to a precise schedule of conditions as regards wood quality, fixing of the elements, marking and dimensional tolerance.

Marking

Various markings of the CP pallets allow their identification:

- the type of pallet, CP1 with CP9
- the code of the manufacturer and/or the reconditionnor
- the date of manufacture
- the possible date of reconditioning

Crates

We are well reckoned wooden packing crates suppliers in the country. Besides, we are among the prominent wooden shipping crates manufacturers, based in india. We provide highly effective Wooden Crates made up of pine wood. We take huge concern on client's packaging needs and serve products as per his requirement. Additionally, we are able to cater customized wooden crates as the specification provided by the clients on grade and dimension.

Shree
SHANKAR VIJAY SAW MILL

Boxes

Catering to the diversified requirements of our esteemed clients, we are offering quality assured Wooden Box. This box is engineered as per the client's specifications by our diligent professionals in our world class infrastructure. We manufactured it with quality assured raw material that is sourced from trusted and well-established vendors. To make it ideal for conveying heavy material and equipments, we are availing it in varied shapes, sizes and with customized design.
